

**STRUCTURAL
SURVEYS**

Expert Witness Services

North West's leading structural survey engineers

Although all projects start off with good intent, not all are completed harmoniously. Disputes do arise and resolution of these disputes will depend on the appointment of suitably qualified and recognised experts.

At **Structural Surveys** we give reasoned, impartial assessments either in the field or in the courtroom.

By providing independent, concise and comprehensive evaluation of technical issues, our expert witnesses can assist in resolving construction and property related disputes.

We can help asset owners and legal advisors develop and implement mitigation strategies.

Contact **Structural Surveys** today to discuss your requirements and learn how we can help you...
