

**STRUCTURAL
SURVEYS**

Residential

North West's leading structural survey engineers

At **Structural Surveys** we help property owners, buyers and vendors, through the process of what is often the biggest transaction of their lives. Whether you simply need peace of mind of knowing that the property is structurally sound and stable, or there is a specific issue with the property that you require investigating, then we can help you. Our Chartered Structural Engineers will provide you with expert, practical advice to enable you to make well informed decisions.

Typically, our structural surveys are categorised as:-

Full Structural Survey

We investigate and report on the whole of the exposed building structure, checking overall stability and integrity. Our fees start at £45000 + VAT

Specific Defect Survey

We investigate and report on a specific issue with the property, such as cracking, roof distortion, subsidence, settlement etc. Our fees start at £350.00 + VAT

How we do it:- We use digital tablet technology to develop our reports at the property, as the survey proceeds. This efficiency provides guaranteed accuracy and quality, together with report delivery within 24 hours of the survey.
